Tortoise, snail, oyster in nature assets that carry their homes with them. Humankind has always envied this freedom...

That's why our motto is;

let your route be *freedom...*

It's time to meet **CARPENTO** caravans with a very special design and production quality to carry the comfort, function and aesthetics of your own home with you.

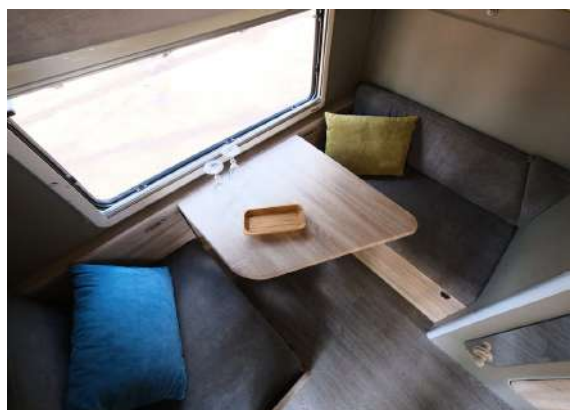

The creator of the brand CARPENTO and the designer of the caravans, Faruk Nurcan, was born in İstanbul, in 1966. He was successfully graduated from Mimar Sinan Faculty of Fine Arts, Department of Industrial Design, in 1987. He's carried out numerous projects in furniture decoration for more than 30 years.

Love of nature and travelling are the greatest motivations of this Project. On the other hand, witnessing the camp life in a Europe trip of 8000 km, while travelling by his own car, in 7 countries and 55 cities has led to the idea of caravan design and production, with a stronger belief.

After 2 years of research and 1 year of product development; the brand CARPENTO and Model 310 comes to existence, and progresively Model 360 and Model 410.

With it's authentic, aesthetic, ergonomic designs, 30 years of production experience and a high quality conception, CARPENTO is ready to be a part of your best memories...

COMPACT...

CARPENTOs creates the difference with the minimum sized body structure design and well-designed large interior capacity...

USAGE..

CARPENTO's unusual lightness and body structure prevents wind resistance when on the move and makes it both easy to use and saves fuel.....

ERGONOMIC...

Convenient (useful, practical, functional) interior capacity and accessible areas of usage with the mechanisms which allows every inch to be used, shows that CARPENTO is user-friendly.....

AESTHETIC...

The most prominent features of CARPENTO is its sympatetic image and panaromic windscreen....
